WILDLIFE REVIEW

NUMBER 177 JUNE 1980

UNITED STATES DEPARTMENT OF THE INTERIOR
FISH AND WILDLIFE SERVICE

In an effort to improve *Wildlife Review* we are using new equipment which provides italics, diacritical marks and other refinements. With the new equipment and programming, manuscript preparation is done entirely in the Editorial Office. We have had to adopt a system that excludes diacritical marks for the author index or else forego conventional alphabetization. We hope that the changes in format are acceptable to our readers.

AVAILABILITY OF REPRINTS AND PUBLICATIONS

Wildlife Review does not distribute any of the papers abstracted herein, nor can the editor of *Wildlife Review* undertake to obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addreddes of most wildlife organizations can be obtained from the *Conservation Directory*, an annual publication available from the National Wildlife Federation, 1412 16th Street, N.W., Washington, D.C. 20036, at a price of $4.00 a copy. This directory lists more than 900 agencies and organizations concerned with natural resources use.

Use of funds for printing this publication approved by the Director of the Office of Management and Budget, March 3, 1976.

Camera copy for this issue of *Wildlife Review* has been generated by computer programs developed by the Editorial Office, U.S. Fish and Wildlife Service, Fort Collins, Colorado.

Hong Kong and Japan are the main centres of this trade, for both raw and carved ivory. The main exporting countries in 1976 and 1977 were Kenya, Zaire and Uganda, and it is is estimated that ivory from over 130,000 elephants entered world trade during 1976 and 1977.--From abstr.

☆ U.S. GOVERNMENT PRINTING OFFICE: 1990—677-103/8

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
